Md Sojib Ahmed

Lab Assignment

1. Write a program to display "hello world" in C.

Anwer:

```
#include<stdio.h>
int main()
{
   printf("Hello World")
   rutrn 0;
}
```

Output:

Hello, World!

2. Write a C program that takes two integers as input and prints their sum.

Anwer:

```
#include<stdio.h>
int main()
{
   int num1 = 7, num2 = 9, sum ;
   sum = num1 + num2 ;
   printf("The value :%d",sum);
   return 0;
}
```

Output:

Enter two integers:16

3. Write a program to calculate the area of triangle [eq: area = 0.5*height*base].

Anwer:

```c
#include <stdio.h>

int main() {
   float base=7, height=12, area;
   area = 0.5 * height * base ;
   printf("Area of the triangle:%f%f\n",area);
   return 0;
}
```

Output:

Area of the triangle:42.00

4. Write a program to calculate area of a circle having its radius (r=5).

Anwer:

```
#include<stdio.h>

int main() {
   float radius = 5, area;

   area = 3.14 * radius * radius;
   printf("The area of the circle is: %.2f\n", area);

   return 0;
}
```

Output:

The area of the circle is: 78.54

5. Write a program to calculate area of an ellipse having its axes (minor 4cm, major=6cm).

Anwer:

```
#include <stdio.h>

int main() {
   float minor = 4, major = 6, area;

   area = 3.14 * minor * major;
   printf("The area of the ellipse is: %.2f\n", area);

   return 0;
}
```

Output:

The area of the ellipse is: 75.36

6. Write a program to calculate simple interest for a given P=4000, T=2, R=5.5. (I = P*T*R/100)

Anwer:

```
#include <stdio.h>

int main() {
   float P = 4000, T = 2, R = 5.5, interest;

   interest = (P * T * R) / 100;
   printf("The simple interest is: %.2f\n", interest);

   return 0;
}
```

Output:

The simple interest is: 440.00

7. Write a C program that takes a temperature in Celsius as input and converts it to Fahrenheit. The formula is: F = (C * 9/5) + 32

Anwer:

```
#include <stdio.h>

int main() {
   float celsius, fahrenheit;
   printf("Enter temperature in Celsius: ");
   scanf("%f", &celsius);
   fahrenheit = (celsius * 9/5) + 32;
   printf("Temperature in Fahrenheit: %.2f\n",
fahrenheit);
   return 0;
}
```

Output: Enter temperature in Celsius: 26

Temperature in Fahrenheit: 78.80
