Khwaja Yunus Ali University

Lab Assignment

Name of the Department: **Computer Science and Engineering**

Course Code: **CSE 0613 - 1202**

Course Title: **Stracture Programing Language Lab**

Assignment No. **01**

Submitted by –	**Submitted to –**
Name: Md. Sojib Ahmed	**Name: Md. Tarequl Islam**
ID Number: 06224205101006	Assistant Professor & Head
Batch No: 18th	Department of CSE
Semester: 1st Year 1st Semester	Khwaja Yunus Ali University
Khwaja Yunus Ali University	

Problem no- 1

```
#include <stdio.h>

int main()
{
    int t;
    scanf("%d",&t);
    while (t--)
    {
        int n;
        scanf("%d",&n);

        if (n == 0)
            printf("Fib(0) = 0\n");
        else
        {
            n++;
            long long int f[n];
            f[0] = 0;
            f[1] = 1;

            for (int i = 2; i < n; i++)
                f[i] = f[i - 1] + f[i - 2];

            printf("Fib(%d) = %lld\n",n-1,f[n - 1]);
        }
    }
    return 0;
}
```

Problem No-2

SUBMISSION # 42499559

PROBLEM:	1176 - Fibonacci Array
ANSWER:	Accepted
LANGUAGE:	C99 (gcc 4.8.5, -std=c99 -O2 -lm) [+0s]

                f[i] = f[i - 1] + f[i - 2];

            printf("Fib(%d) = %lld\n",n-1,f[n - 1]);
        }
    }
    return 0;
}
```

Problem no 3

Write a c program to check a string is palindrome or not without using library function

```
#include <stdio.h>

int main() {
    char word[100];
    int i, length = 0, flag = 1;

    printf("Enter a word: ");
    gets(word);

    for (i = 0; word[i] != '\0'; i++) {
        length++;
    }

    for (i = 0; i < length / 2; i++) {
        if (word[i] != word[length - i - 1]) {
            flag = 0;
            break;
```

```
        }
    }

    if (flag == 1) {
        printf("Palindrome\n");
    } else {
        printf("Not Palindrome\n");
    }

    return 0;
}
```
