

Batch: 18th
Course Title: Computer Fundamentals

1. Presentation Duration & Structure:

- Aim for a **10-12 minutes presentation**, followed by a **3-minute Q&A** session.
- Each group member should contribute to the presentation to demonstrate teamwork.

2. Slide Limit:

- Keep the slides concise: **8-10 slides** (excluding title and thank-you slides).
- Avoid overloading slides with text; focus on key points and visuals.

3. Available Topics:

- **1. LaTeX:** Document preparation system used in academia.
- **2. Microsoft Excel:** Spreadsheet tool for data analysis and visualization.
- **3. Google Classroom:** Online platform for assignments and collaboration.
- **4. GitHub/GitLab:** Version control platforms for code management and collaboration.

***[Four groups were created based on student IDs. For example, students with IDs 01-10 belong to Group A. Each group will select their presentation topic through a lottery system in the next class, scheduled for November 14.]

4. Presentation Content Guidelines:

- **Introduction (1 slide):** Provide an overview of the tool/software, including its purpose and significance.
- **Features & Functionalities (2-3 slides):** Highlight key features, tools, or commands. Use examples or screenshots for clarity.
- **Practical Use Cases (2-3 slides):** Explain common applications or benefits in everyday, academic, or professional settings.
- **Tips & Best Practices (1-2 slides):** Share useful tips for effective usage, shortcuts, or settings.
- **Challenges or Limitations (1 slide):** Briefly discuss any limitations or common difficulties users may face.
- **Summary/Conclusion (1 slide):** Summarize the presentation and restate the tool's importance.

5. Submission:

- Submit your slides to [rahat.cse@kyau.edu.bd] by [19/11/24] for review before the presentation day.
- **Presentation Date: 21/11/24 at 9:10am.**
