

Physics Lab

Viva Questions (Short)

- 1) What is focal length?
- 2) What is power of the lens?
- 3) What is the unit of power of lens?
- 4) What is the basic difference between glass & lens?
- 5) Draw the ray diagram suggested by instructor.
- 6) What are the laws of reflection?
- 7) What are the laws of refraction?
- 8) Write the relation between diopter & meter?
- 9) What is refractive index?
- 10) Define pitch of spherometer.
- 11) What is least count of spherometer?
- 12) Define radius of curvature.
- 13) Write down the equation of radius of curvature.
- 14) What is the radius of curvature for plane surface?
- 15) What is the unit of radius of curvature?
- 16) What is lens?
- 17) What is the unit of main scale reading of spherometer?
- 18) Define spring constant.
- 19) Write the equation for spring constant.
- 20) What is the unit of spring constant?
- 21) If we increase the mass what will happen in spring constant? Increase or decrease
- 22) What is time period?
- 23) What is the relation between stress and strain?
- 24) At what place, the value of 'g' is maximum?
- 25) Write the average value of 'g'.
- 26) Distinct the simple & compound pendulum.
- 27) How do you measure the time period of any pendulum?
- 28) What is resistance?
- 29) What is specific resistance?
- 30) Write down the equation for specific resistance.
- 31) What are the factors on which the resistance of the conductor depends?
- 32) What is the unit of resistance and specific resistance?
- 33) Why the device is called a meter bridge?
- 34) State the Wheatstone bridge principle.
- 35) Give at least one precaution of determination of focal length.
